YAWMAN AND ERBE MFG. CO.

Makers of  Office Filing Systems, Including:

- | | |
|-------------------------------------|--------------------------------------|
| "Y and E" Sectional Filing Cabinets | Genuine Shannon System of Filing |
| "Y and E" Vertical System of Filing | "Y and E" Check Filing Systems |
| "Y and E" Card Index Systems | "Y and E" Legal Blank Systems |
| "Y and E" Card Ledger Systems | "Y and E" Document Filing Systems |
| "Y and E" Commercial Report Systems | "Y and E" Rapid Roller Letter Copier |

And other High-Grade Labor-Saving Office Devices

THE fact that the big "Y and E" factories complete are owned solely by the Yawman and Erbe Manufacturing Company is the best possible guaranty to our customers that "Y and E" Sectional Filing Cabinets and Supplies will always be obtainable.

Record Filing Cabinets

Mechanical Side of  System

THESE pages show a larger and more varied line of Office Filing Equipment *than ever before* displayed in a single catalog or by any one maker.

This second edition of Catalog No. 915E contains no price changes, nor other important alterations from the first edition. Additions to the "Y and E" line, however, will be found in new bill-size Vertical Tray, page 24; new Card Section No. 38 for cards 5x8 in., page 29; and new Map Routing Section No. 89 on page 42. New illustrations of goods previously listed are the two-drawer 5x8 Card Cabinet, page 32, and Single Document File with cloth jacket, page 39.

In the "Y and E" Factories every bit of work which does not require SPECIAL THINKING—which can be made automatic—is handled by the most improved machinery. This Nailing Machine, for example, does far better work than could be done by hand, and in addition, does AS MUCH work as four men could do in the same period of time.

If, moreover you find this variety of Filing Equipment a little bewildering, remember one fact: The "Y and E" purpose back of this book is not to load up the business house with every device that it could possibly use, but to afford the most accurate selection of record files to fit the work in hand. For the "Y and E" slogan is—"Filing Systems that Simplify."

ANOTHER reason:

The small progressive business is here enabled to secure inexpensive files of limited capacity, yet equally efficient from a filing standpoint with those of larger organizations.

OF the *indexing methods*, which are the true basis of every rightly constructed Filing System, this catalog does not treat at all.

Indexing methods *must be specific*, not general. We maintain a corps of representatives trained in the "Y and E" idea that it is the indexing method—not the mechanical device—that gives Filing System efficiency. We supplement these men by a thorough-going System Department at the "Y and E" Home Office. Any business man (anywhere) may secure this "Y and E" System Service without extra charge.

All "Y and E" Filing System Supplies are described and priced in a separate Catalog—No. 1149. Please ask for it

Supplies for "Y and E" Systems:

WE have devoted a special catalog to Filing System Supplies. This catalog covers Indexes, Binding Cases and Supplies for Shannon, Vertical, Commercial Report, Check and Document Filing, and stock ruled and printed cards and guides for Card Index and Card Ledger, together with other miscellaneous supplies. Please ask for catalog No. 1149, provided it does not accompany this catalog.

Terms of Delivery

THE prices quoted in this catalog are net, for the goods delivered, freight prepaid, on all shipments of not less than 100 lbs. to all railway stations in the United States east of New Mexico, Colorado, Wyoming and Montana, when shipped direct from our Factories.

On all shipments of not less than 100 lbs. to stations west of the eastern boundary lines of the above named States, 15 per cent must be added to cover excess freight charges. On goods shipped by express, and on freight shipments of less than 100 lbs., we do not pay charges, except where this catalog specifies "Shipped Prepaid."

All prices in this catalog are strictly net—lowest possible, quality considered, sold direct through our own selling agencies—and are subject to change without notice.

Our liability for any shipment ends when we receive bill of lading from transportation company

The Idea About Sectional Cabinet Construction

"BUY as you need them—build as you want them"—is the apt description by one "Y and E" representative of our Sectional Cabinet Construction. Should you be unfamiliar with the principle involved, the illustrations on this and other pages will make the point clear. Limits in capacity required or space obtainable form the *only* rea-

Ask the "Y and E" representative to demonstrate his Sectional Building Blocks.

No. 10 Top

No. 19, 3-Dr. Shannon Arch Section

No. 32, 4-Dr. 6x4 Card Section

No. 46, Sliding Shelf

No. 54, 2-Dr. Vertical Letter File Section

No. 102 Sanitary Base Section

Note the separate sections which make up this compact, solid-looking cabinet.

sonable basis for selecting *solid* construction instead of "Y and E" Sectional. The solid, permanent appearance of "Y and E" Sectional Stacks deserves special emphasis. A simple "Y and E" device for interlocking sections provides all the rigidity to be possibly desired.

The "Y and E" Idea About Prices

MR. DOOLEY says:

"Whiniver annybody offers to give you somethin' f'r nawthin', or somethin' f'r less thin it's worth, or more f'r somethin' thin its worth, don't take anny chances. Yell f'r a polisman."

A Filing Cabinet is like an egg—its *entire value* depends upon its *quality!*

No piece of household furniture begins to get the daily "hammering" received by a filing cabinet. File drawers loaded with letters, papers, card indexes and index guides are surprisingly heavy. A quickly closed or opened drawer opposes with the entire weight of the contents the strength of both drawer and cabinet.

Few localities have a dry atmosphere. Even if the cabinet should not come apart, would you consider you had bought it cheaply—no matter what the price—if you could only open the drawers by main strength? Or if—to prevent sticking—they must be fitted so loosely as *not* to be dust proof?

The real problem is how to make filing cabinets *strong enough*. And simple enough in action. And most saving in space for the capacity provided.

Enormous output plus splendid factory organization has *reduced* the cost and *raised* the quality of "Y and E" Filing Equipment to the last degree. And the "Y and E" plan of *selling direct* to the consumer through our own trained representatives has kept the selling price—value for dollar—so low that *we court* rigid comparison—quality considered.

Back of the  output and organization is the policy which has won success for the founders of this "Y and E" business from the very start: the desire to give—as well as receive—a square deal; and backed by the financial ability and responsibility to make the guaranty good.

Divide  Cost by length and quality of "Y and E" cabinet Service. *Result:* The GREATEST OBTAINABLE VALUE FOR DOLLAR and hence, LEADERSHIP in the line, demonstrated, indeed, within the pages of this very catalog!

"Y and E" Materials

THE standard wood used in all "Y and E" Filing Cabinets, whether sectional or solid construction, is extremely choice quartered oak. "Y and E" Sectional Cabinets are also carried in stock in figured mahogany.

"Y and E" Standard Finish

IN oak all "Y and E" stock cabinets are golden in color and dull in lustre. This wax finish, known as "Y and E" No. 10, is exceptionally beautiful and wears like iron.

In mahogany all Equipment listed as stock has also a dull wax finish, known as "Y and E" No. 12, the dark reddish shade of which brings forth the beautiful grain of this wood to the greatest degree.

Weathered oak has also a "Y and E" standard, samples of which may be seen at any "Y and E" store. Quotations on special finishes and other woods will be furnished on request.

Illustrating "Y and E" Method of side-locking Sections of equal height in stacks side by side, giving the solidity of a solid construction Cabinet. The thumbscrew is quickly removed or inserted.

Trimmings and Locks

LABEL holders and drawer pulls (usually combined) for all oak cabinet drawers are stamped from solid brass, oxidized. For all mahogany drawers the trimmings are of solid bronze, satin finish. All "Y and E" metal trimmings are absolutely exclusive and original in design, and, like the cabinets, invite the most critical comparison.

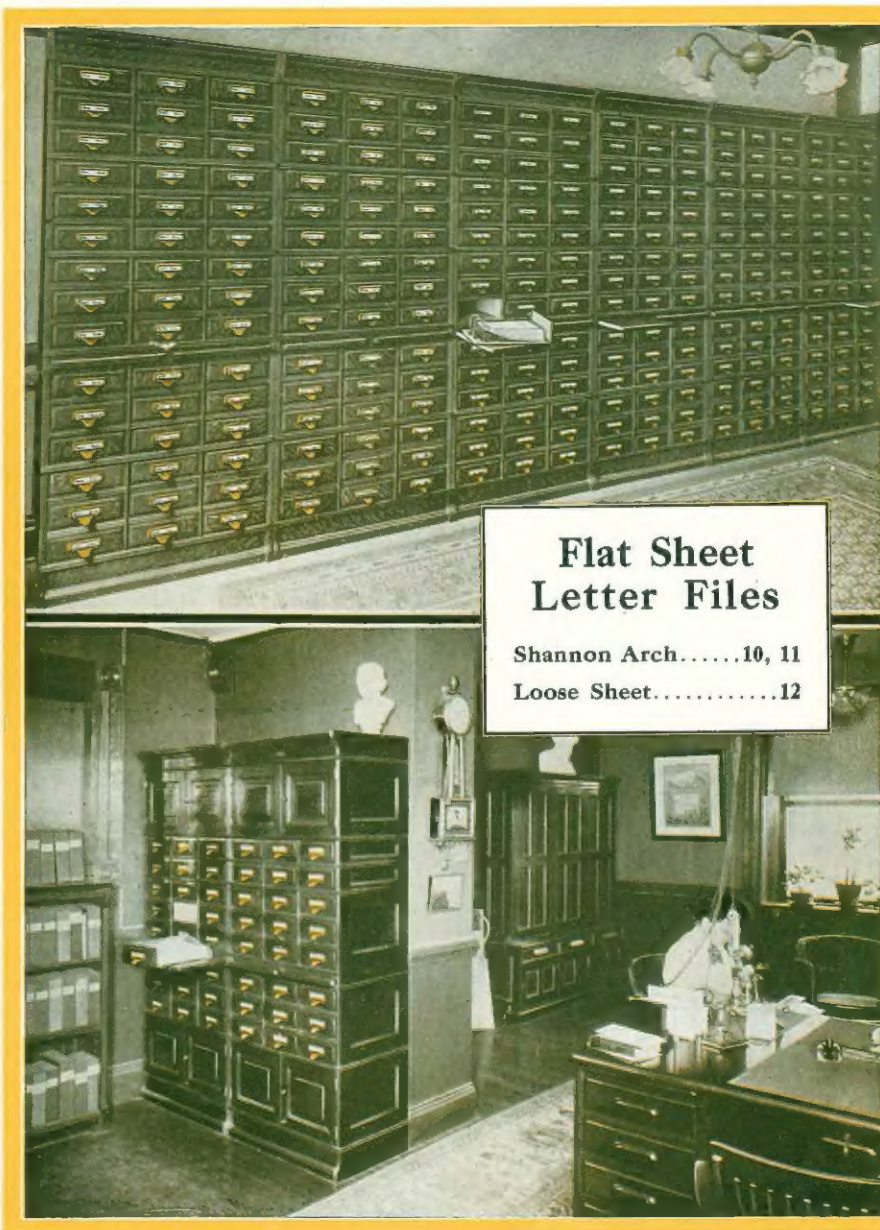

IN the new "*I and A*" (independent and automatic) Combination Lock the "*Y and E*" leadership which originates is well exemplified. Close all the drawers in a cabinet and turn the single key lock which appears in one of the partitions, and *all* are locked. Or, leave all drawers open; turn the key and lock one drawer at a time—any one—simply by closing it. Not necessary to leave one drawer open and close all the others first. No spoiling the lock by forcing drawers shut after the locking drawer has been closed. One lock for all drawers. Each drawer locks independently of the others and automatically. Action simple and positive. Examine the "*I and A*" Lock at any "*Y and E*" selling agency.

For all *single* drawers *S & G* locks, notably the best for this purpose, are supplied.

Sizes of "Y and E" Sections

Standard width, 33 in.
Standard maximum height, 14½ in., except Section No. 115 (page 48), which is double height.
Standard minimum height, ½ in.
Standard depths from front to back, 17 in. and 25 in.

A finished rail 8 in. deep covers the front of all 25 in. sections upon which it may be desired to stack 17 in. deep sections. This ledge is useful for reference, as well as symmetrical in appearance.

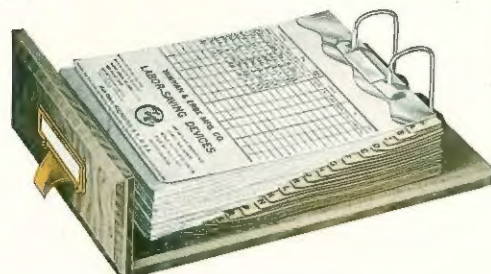

Flat Sheet Letter Files

Shannon Arch.....10, 11
Loose Sheet.....12

30 Shannon Sections No. 20 in 6 stacks with tops, bases and sliding shelf sections

A private office with 2 stacks each containing 2 loose sheet sections No. 22; 2 No. 21; with Sliding Shelves and with No. 17 Storage Sections at top and bottom

Genuine Shannon Sectional Cabinets

Compressor on cover keeps papers compactly together; printed form shows record of transfers for locating back correspondence.

THE Shannon Arch method has been for twenty years, and is today, the safest way to file letter or cap size papers.

Prices quoted include stock index (please specify in your order the style of indexes desired).

Price "with lock" means the "I and A" combination locking device described on page 8.

No. 19. 3-Dr. Letter-size Section.
No. 23. 3-Dr. Cap-size Section.

No. 20. 9-Dr. Letter-size Section.
No. 18. 9-Dr. Cap-size Section.

Genuine Shannon Cabinets of Solid Construction

2-Dr. Cabinet.

3-Dr. Cabinet.

STRANGE, is it not?—that a man will select a handsome office desk and keep his correspondence-records in a *common binding case* on top of it! For letters and records—whether business or personal—one of these small size SHANNON Cabinets will provide convenient, permanent, and handsome filing space.

For cost of substituting a Double Compartment Card Index Drawer for a Shannon Cabinet Drawer—see page 28

6-Dr. Cabinet.

4-Dr. Cabinet.

These Cabinets are so constructed that Cap size Shannon Drawers, double compartment Card Drawers (see page 30) or No. 66 and No. 67 Sectional Box Drawers (see page 46) may be substituted for the regular drawers here listed. Ask for prices.

Summary Solid Construction Shannon Cabinets—4 Sizes

Number of File Drawers.	File-Drawers.		Style.	Quar. Oak. Price, including Indexes and Perforator.		Weight Packed for Shipment Pounds.	Dimensions of Cabinets, in inches.		
	Wide.	High.		Without Lock.	With Lock.		Width.	Height.	Depth.
2	1	2	A	\$ 6.00	\$ 7.50*	25	11 1/4	9 5/16	18 1/8
3	1	3	A	8.00	10.25*	35	11 1/4	13 5/8	18 1/8
4	1	4	A	10.00	13.00*	45	11 1/4	18 1/4	18 1/8
6	2	3	A	15.50	18.50†	70	22 1/8	14 3/4	18 1/8

*Each drawer locked with flat key lock. †The 6-dr. Cabinet—"Price with Lock"—has I and A Locking attachment, locking all drawers simultaneously.
Locks (S. & G.) on private drawers, when desired, 75c each.

Delivered subject to terms on page 4

For Indexes, Supplies and Transfer Cases, see separate catalog No. 1149

"Y and E" Loose Sheet Sectional Cabinets

No. 21. 3-Dr. Loose Sheet Section.

No. 22. 9-Dr. Loose Sheet Section.

WE do not recommend Loose Sheet Filing for correspondence. Either Shannon (if a flat method is desired) or Vertical (which affords the best possible classification) is much better. Those who prefer flat loose sheet files, however, will find the "Y and E" product easily the best on the market. One feature is exceptional capacity, since the index takes only $\frac{1}{8}$ -inch instead of the usual $\frac{1}{2}$ -inch space at the back of the file drawer.

For this reason these sections are widely used by railroads and commercial traffic departments for filing tariffs.

Size of papers accommodated: $9 \times 12\frac{1}{4}$ inches.
Inside filing space: $3\frac{1}{2}$ inches high.

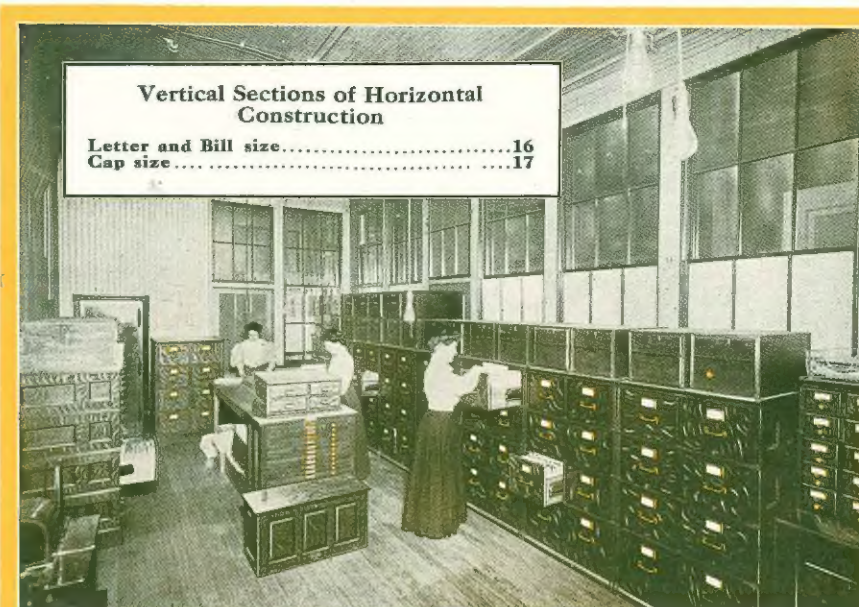

Fitted with heavy spring compressor. Indexes furnished as ordered. Specify subdivisions wanted.

Summary—2 Loose Sheet Sections

Section No. or Size.	Quar. Oak Price.		Mahogany Price.		Shipping Wt. lbs.	Inside Dimensions each Drawer.			Outside Dimensions of Sections.		
	With-out Lock.	With I and A Lock.	With-out Lock.	With I and A Lock.		Wide in.	High in.	Deep in.	Wide in.	High in.	Deep in.
*21, 3-Dr. L. S.	\$ 6.50	\$ 8.50	\$ 9.00	\$11.00	35	9 $\frac{1}{8}$	3 $\frac{3}{8}$	12 $\frac{3}{4}$	33	4 $\frac{3}{4}$	17
*22, 9-Dr. L. S.	14.00	17.50	18.00	21.50	75	9 $\frac{1}{8}$	3 $\frac{3}{8}$	12 $\frac{3}{4}$	33	14 $\frac{3}{4}$	17

*Indexes, extra, 35c each. Suspension Devices on Drawers, for No. 21 Section, 50c; No. 22 Section, \$1.50.

Delivered subject to terms on page 4

A Boston Filing Room with 36 "Y and E" Vertical Sections No. 59. Capacity over 300,000 papers

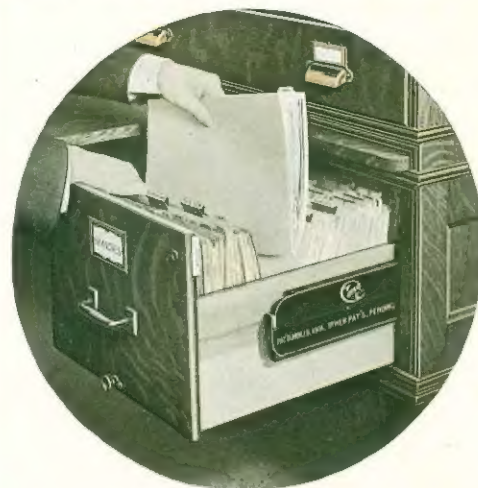

Upright Vertical Sections—32 of them—in a row. 8 No. 402, 3 No. 406, and 21 No. 404. Capacity over 450,000 papers

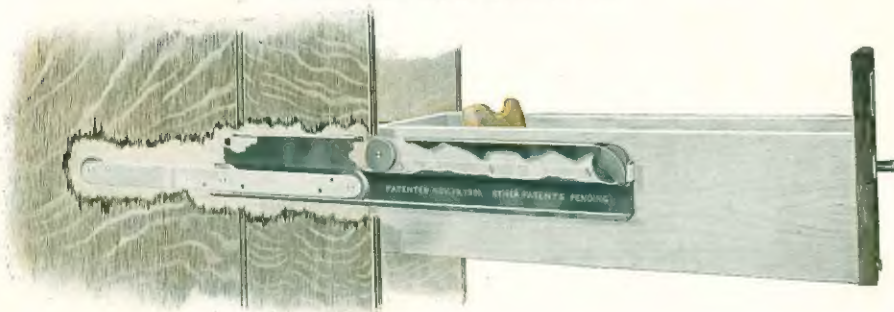

Complete "Y and E" Equipment for Vertical Filing

THE key note to Vertical filing—the feature that decides whether you have simply a repository for letters or an active business-building system placing complete sales statistics at your fingers' ends—is the INDEXING arrangement. This is a big subject—so big that we have devoted a special 40-page booklet to it.

If there is the least doubt about the efficiency of your Vertical Indexing do not think of selecting cabinet equipment until you have read "Y and E" Hand-Book on Vertical Filing, No. 515.

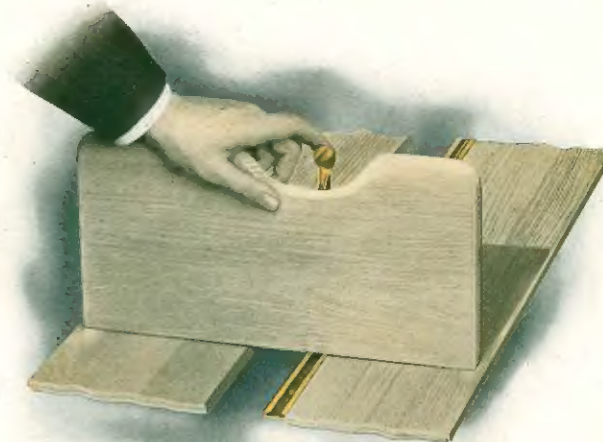

"Y and E" Roller Bearing Steel Suspension for Vertical File Drawers

TO offset the terrific strain which a Vertical file drawer, weighing with contents from 50 to 80 pounds, undergoes in daily use, we provide each "Y and E" letter or cap size Vertical drawer with this *Roller Bearing Steel Suspension*—an exclusive "Y and E" patented feature obtainable on no other cabinets. This suspension *rolls* instead of sliding. The pull of your little finger will operate the drawer no matter how heavily loaded. Twenty years are easily added to the life of a cabinet through its use. *Drawers cannot stick!*

Other Exclusive "Y and E" Features of Vertical Construction

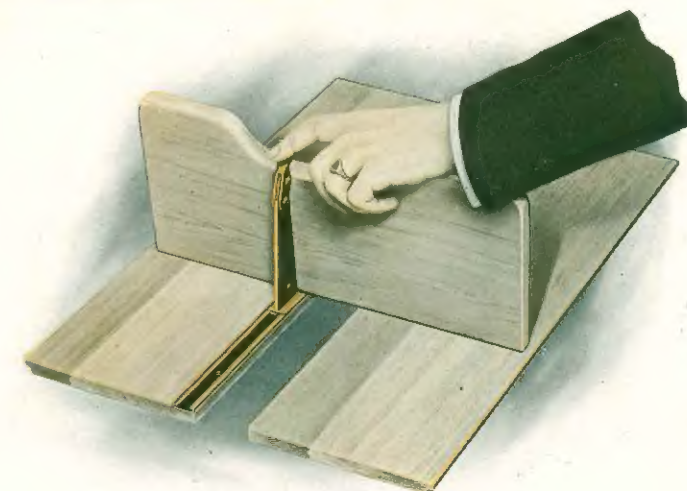

THIS typical "Y and E" Vertical drawer is mechanically perfect. The sliding compressor will not stick. The release of the adjustable spring is positive, and the metal-on-metal of spring and track insures smooth operation. A countersunk round rod passing through the bottoms of guide extensions keeps guides and papers in place.

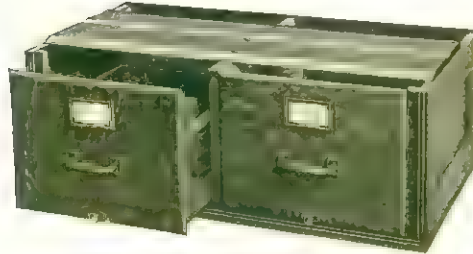

Cam Lever Compressor

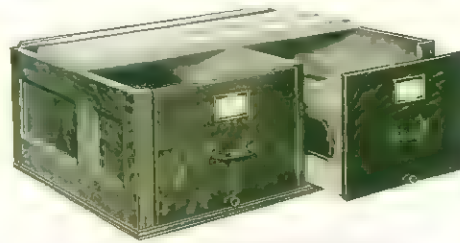

FOR cap size Vertical file drawers we provide this Cam Lever compressor, which is extra positive, to offset the weight of papers carried in these drawers. The simple operation of this "Y and E" device is shown in the illustrations.

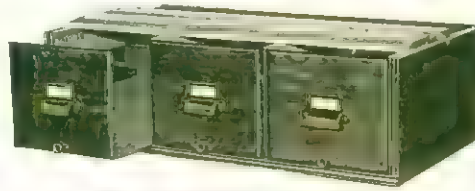

“Y and E” Horizontal Vertical Sections
(Fitted with Roller Bearing Steel Suspension, except Bill Size Section 42.)

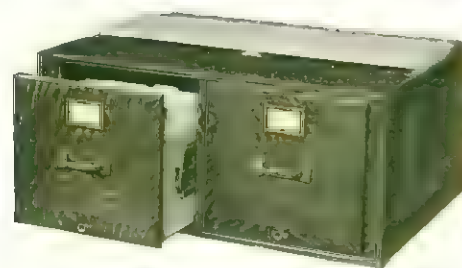

No. 54. 2-Dr., Letter size, 17 in. deep.

Paneled End
Removable

ONE very attractive feature of this construction is the combination of Card Index drawers and Document File compartments with Vertical drawers in the same sections. Indeed, sections containing Card Index or Document drawers solely may be selected.

Further information is given on *page 20*.

THE above stack might also show this Upright Storage Section No. 408. For stationery and supplies primarily, and sometimes used as a wardrobe. Fitted with adjustable shelving. See *page 21* for complete prices.

Commercial Grade of "Y and E" Upright Vertical Sections

Bill Size No. 502, Letter Size No. 504, Cap Size No. 506

WE have cheapened these Sections—not by weak or poorer construction—but by substituting plain oak in some parts; by using less expensive face trimmings; and by making a less expensive compressor. While the ends are plain oak, the drawer fronts remain quartered oak.

Dimensions are identical with regular stock Sections No. 402, No. 404 and No. 406.

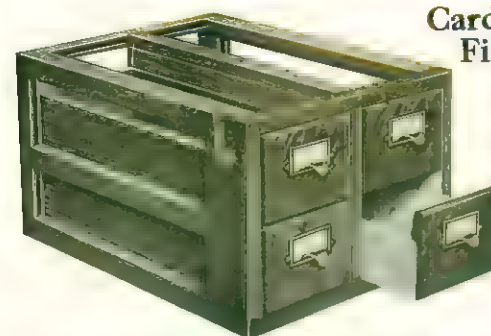

For prices, see *page 21*.

DETAIL showing the principle of "Y and E" Upright Sectional Construction. One pair of paneled ends will enclose any number of "Y and E" Upright Sections. Ends instantly removed or attached by thumb-screw.

Inside Dimensions of Vertical Drawers in all Upright "Y and E" Sections

"Y and E" Vertical Trays and Tray Outfits

IN these Vertical Trays and Tray Outfits we have demonstrated two things:

(1st) That where the filing capacity desired is limited, a perfect filing system, with all the advantages of "Y and E" Vertical, can be secured at little cost.

(2nd) That each different office department should have a Vertical file in which to keep the records of its work; also for papers in transit and notably for follow-up.

These outfits demonstrate that time-saving filing is not a question of capacity but of method and arrangement.

For complete price list see page 25.

Complete Outfit No. 103, Letter Size

Complete Outfit No. 110, Cap Size

Capacity—3000 letters or papers.

THIS is a complete "Y and E" Vertical System for indexing alphabetically by name or locality. Note the details of this outfit as to folders and guides given in the table on page 25. Note also the special delivery terms.

The letter size tray will hold papers 11 $\frac{1}{4}$ x9 inches.

The cap size tray will hold papers 15x9 inches.

Complete Follow-up Outfits—No. 104, Letter Size and No. 111, Cap Size

Capacity—3000 letters or papers.

THE tireless automatic servant of the business organization of today is the Follow-up System. This is a mechanical method of keeping track of matters pending. It is used in Sales, Advertising, Purchasing, Order, and Shipping Departments constantly and effects a direct saving in time, mistakes, and expense too great to estimate. It is used by the office executive to follow through the matters which he has delegated to others. This outfit is exactly the thing needed.

See complete price table,
page 25.

Attorneys' Outfit No. 109

Capacity—3000 cap size papers

HERE is a system that simplifies many filing problems for the attorney. If from 2500 to 3000 records is capacity enough, it is all the filing system he needs. If his requirements are for larger files, this outfit should be kept near his desk for all *live* matters. The space occupied by the guides numbered in tens from ten to fifty is devoted to legal forms. Each form is assigned a number, which thus becomes the index to it.

Trays Only

FROM a constructional standpoint these trays are equal in every respect to the larger "Y and E" Cabinets.

Letter, cap and bill sizes of tray are provided. Remember that this tray is a complete Vertical file with sliding compressor and countersunk round rod to keep papers from slipping under guides. The hinged covers lie flat against the sides when the tray is in use, and keep the contents dust-proof when closed.

Bill Size Vertical Tray

THIS is a recent addition to the line to meet a growing demand for a Vertical Tray for papers 10x7 7/8 inches or smaller. Widely used by Accounting and Collection Departments. Can be most conveniently placed upon a "Y and E" Swinging Office Stand. See page 26.

For price list of Trays only, see page 25.

Summary—5 Complete Vertical Tray Outfits (Each "Y and E" Vertical Tray has capacity for 3000 letters or papers.)

DELIVERY TERMS—Complete Vertical Tray Outfits are delivered charges prepaid to any railroad station in the United States east of New Mexico, Colorado, Wyoming, Montana. To points west of the eastern boundary lines of the above states, where we have a special agency or "Y and E" Branch, add 15 per cent to cover excess freight charges. For other points, see "Terms of Delivery" on page 4.

Vertical Tray Caster Base

FREQUENTLY two clerks work alternately upon the same records. A Vertical Tray outfit placed upon this base can be moved back and forth between different parts of the office with the greatest ease. The height of the base is exactly right, also, for reference to the tray by the office man sitting at his desk.

Made in two sizes for papers, letter and cap.

See Price Table Above

"Y and E" Swinging Office Stand

DIMENSIONS of table 17x17 inches. Height of side rod 24½ inches over all.

Adjustment (may be raised or lowered) 6¼ inches.

Shipping weight (in knock down form) 22 pounds.

Price complete—quartered oak, \$4.00 each; mahogany, \$4.75 each.

In ordering, specify whether nicked or oxidized copper trimmings are preferred.

"Y and E" Utility Desk Tray

THIS is by all odds the handiest item in the office. It is a tray to hold both incoming and outgoing letters, as well as the accumulation of letters, papers, records and what not—collected on the busy man's desk.

This Tray is of choice Golden Quartered Oak, harmonizing splendidly with other furniture. The opening is on the side—the logical place to grasp contents—instead of at the top or bottom.

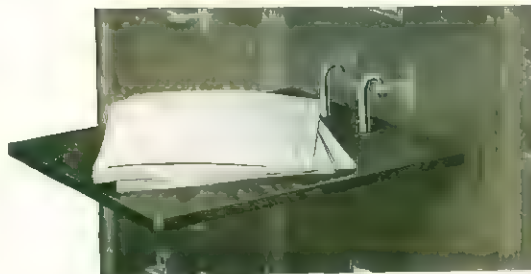

Price each in Golden Quartered Oak, \$1.50
In Mahogany, \$2.00

Dimensions: 9¼x12x2½ inches inside.

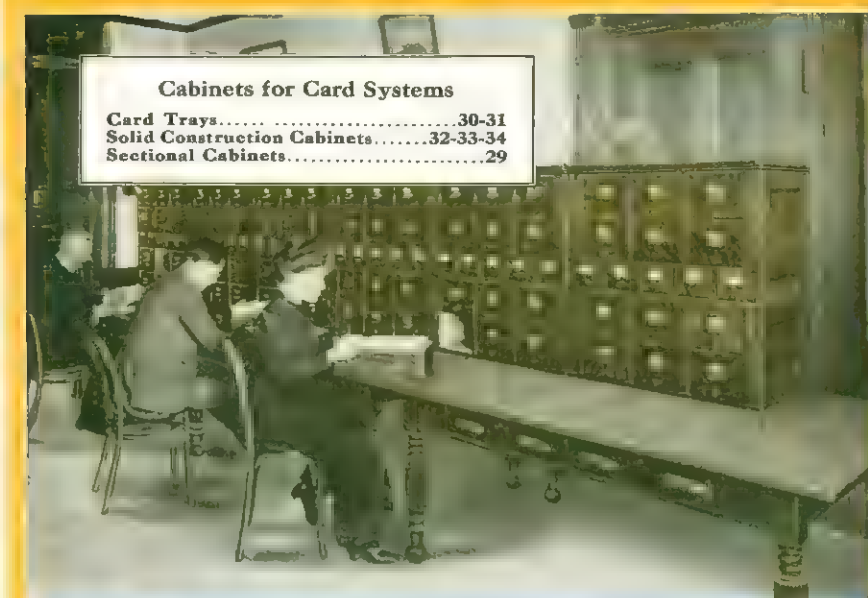

"Y and E" Adaptable Reference Shelf

FOR Vertical Filing this Shelf is a new and novel convenience. Hangs on any "Y and E" letter or cap size Vertical Drawer Pull. May also be used on Desk Pulls of similar shape, or on a special Pull attached to the Cabinet or the wall.

Price each in Golden Quartered Oak, \$1.00
Dimensions: 12x12 inches over all.

Rods for "Y and E" Card Cabinets

"Y and E"
Flat Rod on
edge—cards
may be inserted
or removed.

"Y and E" Flat Rod

(Patented)

ONE-QUARTER turn places the rod either flat side up—so that cards may *not* be removed—or vertically so that card or cards may be quickly taken out of the drawer. This is accomplished without taking the rod out of the drawer at all—a feature exclusive with this "Y and E" device.

"Y and E" End-Locking Round Rod

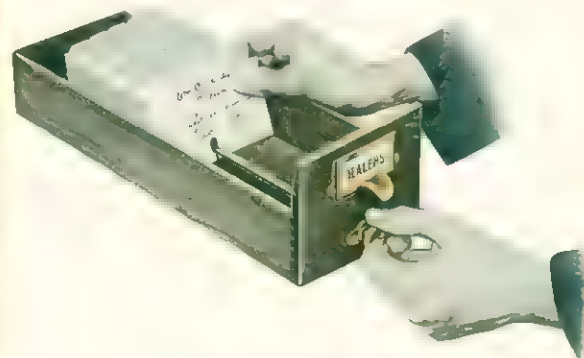

FOR keeping cards under lock and key. Lock, neck and rod all operate in the same casing. The insertion of a key in the end of the rod-head releases the rod with a quarter turn in either direction.

Rods equipped with this locking adjustment, *extra*, each 75c.

Round Rods with Spring Locks

This lock has key-hole on the face of the card drawer separate from the knob. The end-locking rod is usually preferred, however.

Rods equipped with individual spring locks, *extra*, each 75c.

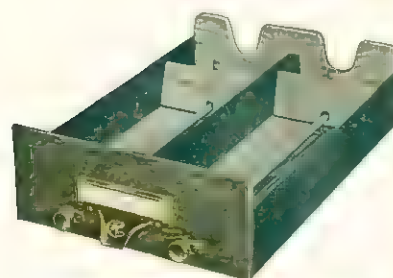

"Y and E" Flat Rod in position—cards firmly locked.

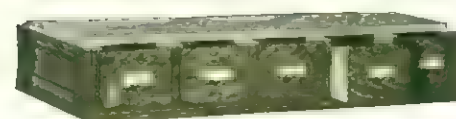

Card Index Substitute Drawer

CONTAINS two Card Index compartments, for cards 5x3 in., each 14 inches deep inside. This drawer may be substituted in any of the following sections on the following basis:

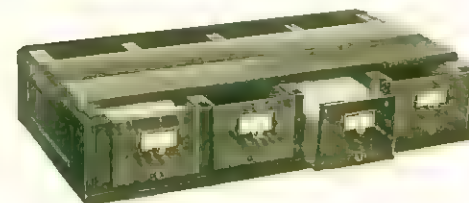

When fitted with flat or round rods and substituted for any Loose Sheet Drawer (page 12); or for any Shannon Drawer (pages 10 and 11); **add \$1.75**. When substituted for any Box Drawer in Nos. 66 or 67 sections (page 46), or for any solid construction Shannon Cabinet Drawer (page 11); **add \$2.00** to regular price of Sectional or Solid Cabinets.

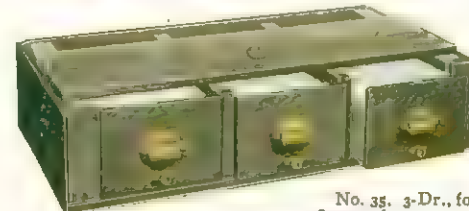

Drawer only, fitted with flat or round rods: Oak, \$2.50; Mahogany, \$3.00. When furnished without rods, deduct 50c from any of the above prices.

No. 29. 5-Dr., for 5x3 cards.

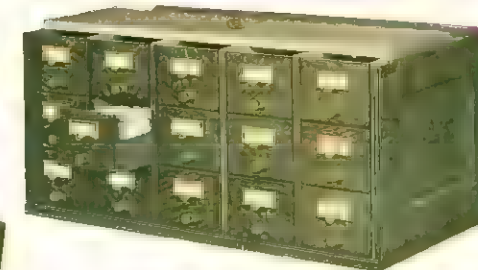

No. 32. 4-Dr., for 6x4 cards.

No. 35. 3-Dr., for 8x5 cards.

No. 38. 5-Dr., for 5x8 cards.

Catalog
No. 1149

2-Drawer Cabinet, Style A. In ordering, specify: "1 wide by 2 high." Carried for 5x3 cards only. Quartered oak.

2-Drawer Cabinet, Style A. In ordering, specify: "2 wide by 1 high." Carried in 5x3, 6x4 and 8x5 sizes.

EACH "Y and E" card drawer of style A construction will hold 1250 light weight cards, 1000 medium weight cards, or 750 heavy weight cards.

THIS two-drawer cabinet for 5x8 cards is used particularly for commercial or bank ledger records. See also one-drawer cabinet, page 31, and five-drawer section, page 29.

2-Drawer Cabinet No. 258A for 5x8 cards only.

4-Drawer Cabinet, Style A. Carried in 5x3, 6x4 and 8x5 sizes.

6-Drawer Cabinet, Style A. Carried in 5x3, 6x4 and 8x5 sizes.

For complete price list see page 33

9-Dr. Cabinet, Style A for 5x3 cards only.

12-Dr. Cabinet, Style A, for 5x3 cards only.

The Key Numbers Below

OF course, "53," "64" and "85" indicate card sizes 5x3, 6x4 and 8x5. To each of these we prefix a numeral indicating number of drawers; thus "153" means one-drawer, size 5x3. To this number we add the letter indicating style of construction, A or B. Simple enough, isn't it? Please order, then, by number.

1-Dr. Cabinet, Style B. For 5x3 Cards only.

2-Dr. Cabinet, Style B. For 5x3 Cards only.

3-Dr. Cabinet, Style B, Sizes 5x3 and 6x4.

THIS construction economizes some space and has the particular advantage of safeguarding the drawer from being pulled 'way out. The suspension slides also make the loaded drawer perfectly easy to handle. This is the same style roller bearing steel suspension used in "Y and E" Vertical Cabinets. Note also this style card drawer shown on page 20.

Remember that each Style B Card Dr. has two compartments

Summary—Style B—Card Cabinets

Please order by number. (Prices subject to change without notice)

No.	Quartered Oak, Price.		Shipping Weight Without Cards.	*Outside Dimensions.			Card Capacity.

* Dimensions exclusive of trimmings.

Each Style B (Double Compartment) drawer is 20 in. deep inside. If Rods—Flat or Round—are desired, add 50c per drawer.

Delivered subject to terms on page 4

For Card System Supplies see separate Catalog No. 1149

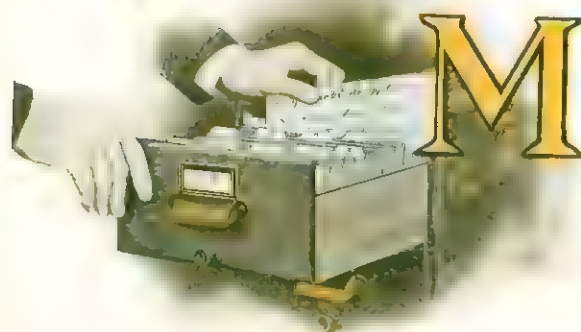

Two left hand stacks are Check File Sections No. 44. Right hand stacks are Card Index. Office is that of large publisher

Typical Commercial Report Folder in practical use

Two Sectional stacks each containing four Document Sections No. 28 and Storage Base No. 7 for storage of supplies

"Y and E" Check File Cabinets

MORE business houses are coming constantly to the use of the Check Voucher System. Their checks, therefore, are filed as vouchers, either in numerical sequence or by name of concern to whom issued. While these "Y and E" cabinets were made primarily for banks, they are also

being very widely purchased by railroads and corporations for the purpose named. Even where the check does not form the voucher as well, it is best to file cancelled checks in this way.

Check File Tray.

"Y and E" Check File Tray, and Solid Construction Cabinets

THE tray or one-drawer cabinet is frequently used with daily or monthly guides as a note tickler. The variety of sizes shown here makes selection very easy. Sectional construction is, of course, to be preferred where additional capacity is likely to be needed. See Price Table, page 36.

Stack of "Y and E" Daily Report Sections

THIS solid looking cabinet is made up of three Daily Report sections—No. 73 with one No. 10 top and one No. 2 Sanitary Base. The latter raises the stack to a convenient height for reference.

Delivered subject to terms on page 4

“Y and E” Map-Routing Section

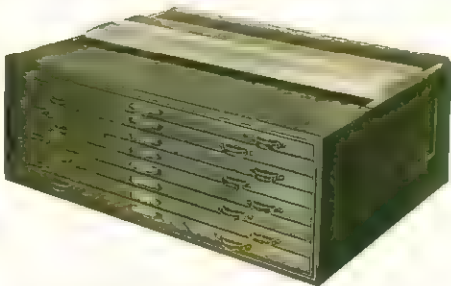

TELLS you at a glance the route of each traveling man and is invaluable in covering territory economically and systematically.

Different colored tacks and cord in connection with maps neatly mounted in these shallow drawers make up the system. The tacks indicate by their colors different grades and kinds of branches and agencies. City selling territories can be indicated in the same way.

THE first fact necessary in laying out a system to meet your distinct needs is the number of maps you want to file and what they are. We can then tell you just how many drawers you will need and give you a definite quotation.

No. 89. 4-Dr. Map Section. Outside depth 25 in.

No. 88. 8-Dr. Map Section. Outside depth, 25 in.

Storage Sectional Cabinets

"Bookcase Style".....	48-49
Roller Book Shelves.....	50
Book Stall and Open Storage.....	50
"Cupboard Style".....	51

The two upper tiers of this cabinet consist of four Storage Sections No. 53 with "Retiring" Paneled Oak Door. In each stack, below these, are Shannon Sections No. 18; 5x3 Card Sections No. 29; Vertical Sections No. 60; and Vertical Sections No. 59

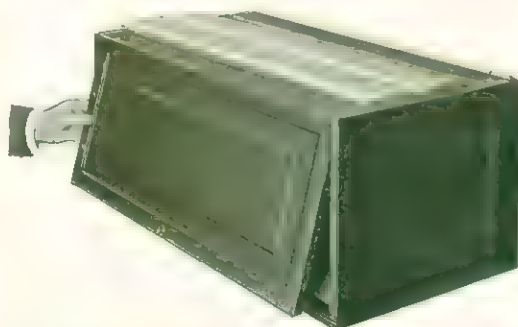

"Y and E" Storage Sections

Adjustable Shelving is provided for all Storage Sections Nos. 15, 17, 52, 53, 55 and 115

"Y and E" Storage Section No. 52. With single glass door—"retiring" construction.

WHERE the contents cannot be made to look neat, this paneled wood door is preferable to the glass door. This makes the correct advertising department file for newspapers and magazines pending checking and clipping.

"Y and E" Storage Section No. 53. With single "retiring" door of Paneled Oak. Note these Sections in the stack on page 47.

See Price Table, page 49

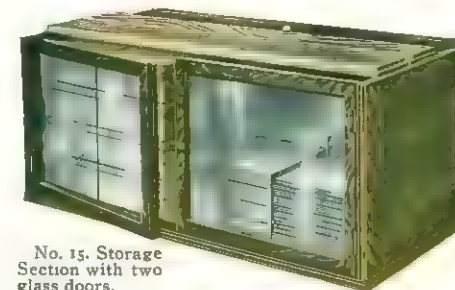

"Y and E" Storage Section No. 115. With double glass doors.

WE have dropped the name "Bookcase," because these sections are used for so many other purposes. At least one of the eight styles illustrated on pages 48, 49 and 50 is needed in every office.

THIS double-height Storage Section is a most economical purchase if you can use the capacity. The shelves are adjustable and can be removed entirely. This section is frequently used by physicians for keeping instruments, and for other purposes where the articles or books are unusually high.

"Y and E" Storage Sections—

Continued

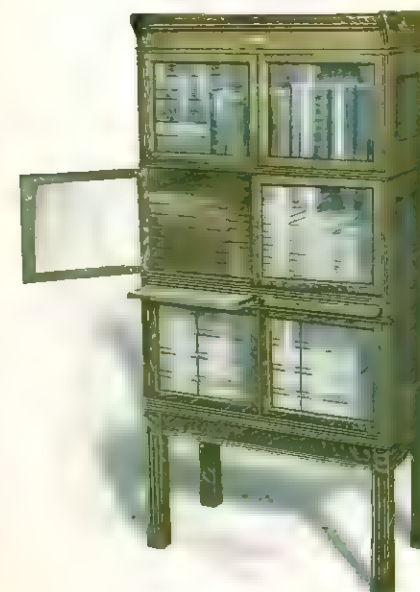

No. 15. Storage Section with two glass doors.

*Adjustable Shelves, faced with either quartered oak or mahogany, ends reinforced, countersunk battens, extra, each, \$1.25. †Two adjustable shelves are included with Sec. No. 115 without extra charge.

This stack consists of three Storage Sections, No. 15 with Sanitary Base, Sectional Top and a Sliding Shelf Section.

Top No. 10.

Storage Section No. 15.

Storage Section No. 15.

Sliding Shelf No. 46.

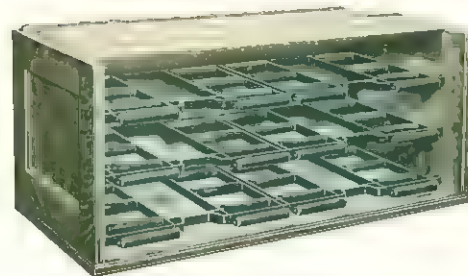

Storage Section No. 15.

Sanitary Base No. 2.

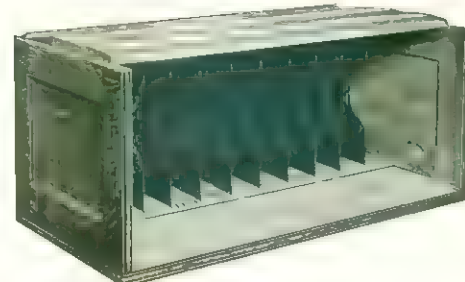

THE advantage of double doors is that you can get a little more filing capacity than with the single doors. In other respects, there is nothing except personal preference upon which to base your selection. Any of the seven "Y and E" Storage Sections shown on pages 48, 49 and 50 (we omit double height section No. 115) can be secured with any of the four styles of doors illustrated—Single Glass Door—Double Glass Doors—Single Paneled Wood Door—Double Paneled Wood Doors.

Delivered subject to terms on page 4

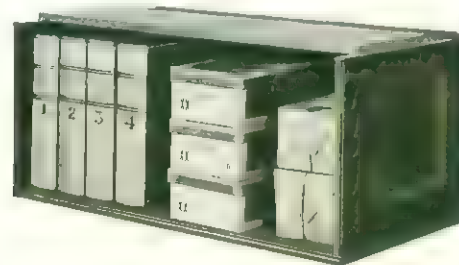

Book Stall, Storage, Roller Book Shelf and Storage Sections

No. 83. Roller Book Shelf Section, 17 in. deep. For easy storage of heavy books. Contains three double adjustable metal roller shelves.

No. 85. Book Stall Section (without doors).
No. 86. Book Stall Section (with wood paneled doors like No. 17 Section shown on page 51.)
Fitted with 10 adjustable metal partitions, for catalog filing.

No. 55. Storage Section (without door), 17 in. deep.

Delivered subject to terms on page 4

THESE sections with double paneled wood doors are especially for storing stationery and supplies. Note how handily they are placed in the double stack of Vertical, Card Index and Box Drawer Sections illustrated. Note also the Storage Base Section No. 7 on page 56.

No. 90—"Y and E" Desk Section

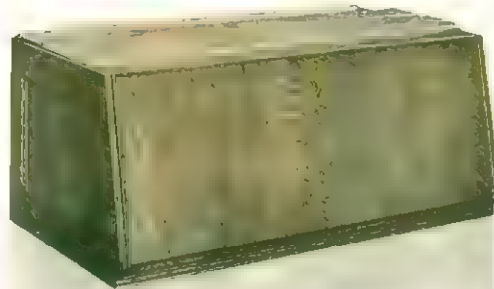

WIDTH, 33 in. Height, 14 1/4 in. Dimensions of writing bed, open, 31 3/8 x 31 3/8 in. Interior of Section is fitted as follows: Contains 1 drawer 9 1/2 x 1 1/8 x 10 1/4 in. inside; 4 openings each 10 x 2 x 11 in., suitable for letter paper, bill heads, and the like; 3 openings each 4 7/8 x 2 x 11 in., suitable for envelopes and similar shaped papers; 3 openings each 1 1/2 x 6 1/2 x 11 in.; 2 pen racks.

CLEARANCE beneath openings at each side is 5 in.; clearance at center is 7 in.—sufficient for 5x3 or 6x4 in. Card Tray.

Shipping weight, 90 pounds.

Price, with lock, in quartered oak, \$15.00; mahogany, \$23.00.

Make-up of This Stack

ABOVE the Desk Section here illustrated in a practical stack, is No. 42, 3-Dr. Bill File Section, and No. 29, 5-Dr., 5x3 Card Index Section, together with Low Top No. 12. Below the Desk Section is 2-Dr. Vertical Letter File Section No. 60, and Sanitary Base No. 6, the latter bringing the entire stack to exactly the right height. This "Y and E" Desk Section may be stacked with either 17 in. deep or 25 in. deep Sections.

Delivered subject to terms on page 4

"Y and E" Storage Base and Sliding Shelf Sections

No. 7. Storage Base, 25 in. deep; contains two sliding shelves 15 1/4 in. wide; double door Cupboard, divided by removable horizontal partitions, S. & G. lock.

Storage Section and Base—two combinations (see Summary below).

THE propositions featured on this page are decidedly worth while.

Stationery and supplies run into lots of money. It is profitable to store them as indicated here and also on pages 47 to 51 inclusive. Sliding Shelf Sections save no end of steps in the day's work. These shelves are literally "disappearing tables" and their position in a stack puts them where they will be most handy.

No. 46—Sliding Shelf, 17 in. deep.

No. 78—Sliding Shelf, 25 in. deep.

Summary—1 Storage, 2 Combinations, 2 Sliding Shelf Sections

"Y and E" Truck and Invisible Caster Bases

No. 4. Truck Base, 17 in. deep. Handle extra.

No. 8. Truck Base, 25 in. deep. Handle extra.

No. 104. Invisible Caster Base, 17 in. deep.
No. 108. Invisible Caster Base, 25 in. deep.

No. 401. Invisible Caster Base for Upright Bill Size Sections.
No. 403. Invisible Caster Base for Upright Letter Size Sections.
No. 405. Invisible Caster Base for Upright Cap Size Sections.

THE upper pair of bases are for use where the stack is to be run into the vault at night or where it is to be shifted around the office.

The lower ones—the Invisible Caster Bases—are simply designed to make it easy to shift any stack for rearrangement of cabinets or for floor-cleaning.

These caster bases work with our regular stock bases, Nos. 1 and 5, and with the Upright Sections, and raise the stack 1/4 inch above the floor.

Summary—2 Truck Bases; 5 Invisible Caster Bases

Section No.	Quar. Oak Price.	Mahogany Price.	Ship. Wt. Pounds.	Outside Dimensions.		
				Inches Wide.	Inches High.	Inches Deep.

*For fibre wheels, add \$1.50.

†Iron handle for truck base and braces, extra, \$1.00.

"Y and E" Vault Truck

THIS vault truck means easy transportation between the office and the vault for records of every kind. Record filing cabinets may be fitted permanently to the truck. Widely used by commercial houses as well as banks.

For books and other flat records, adjustable shelving may be secured. The truck is constructed to hold shelves $2\frac{1}{2}$ inches or more apart.

Dimensions of truck—35 in. wide, 40 in. high, 18 in. deep outside; contains two compartments, each $33\frac{1}{2}$ in. wide by $15\frac{3}{8}$ in. high by $17\frac{1}{4}$ in. deep inside. Height of body alone, exclusive of casters, 40 in.; shipping weight, 200 lbs.

Price, in golden quartered oak, fitted with two 8 in. truck wheels, rubber-tired, and two 6 in. guide wheels, rubber-tired, with ball-bearing casters, \$30.00.

Same with fibre-tired wheels instead of rubber, \$40.00.

Adjustable shelves, each, extra, \$1.75.

Delivered subject to terms on page 4

Vault Fitted Up With "Y and E" Sectional Filing Equipment

THESE two illustrations show a bank vault fitted up with "Y and E" sections for filing checks, documents, correspondence and other records of every character. Note also the roller book sections for keeping books of record.

Any business house having a vault can economize space in this way to great advantage, for the cabinets more than save the space they occupy by their compact methods of keeping records.

THE vault truck illustrated is fitted with stock sectional cabinets, the drawers of which are used for sorting and filing checks, and the truck and contents are easily rolled into the vault for safe-keeping at night.

We shall be glad to take up with you in detail the planning of an arrangement of "Y and E" stock cabinets to meet your specific requirements.

"Y and E" Rapid Roller Letter Copier

Why it is Better than the Old Style Letter Press

ONLY a few reasons can be presented here, but these are well worth noting:

1—It makes copies in one-twentieth the time.

2—It makes possible a number of facsimile copies by simply passing original through Copier required number of times.

3—It makes better facsimile copies, eliminating the chance of blurring, since the copying paper is evenly moistened and pressure is uniform.

4—It effects a direct saving of 60 per cent in copying materials alone—thereby refunding its cost in a short time.

Why it Makes Better Copies than Carbon Method

1—It produces copies made AFTER all corrections and alterations have been made—not before. This means that on your file copy you have a record—secured automatically—of the corrections and signature entered on the original.

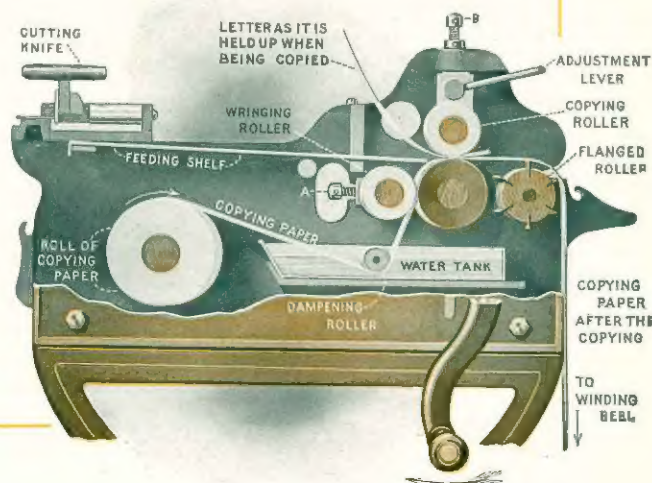

2—Time is saved in correcting several carbon copies, since corrections need be made but once—on the original.

3—Copier copies occupy minimum space in the files.

4—It effects a direct saving of more than 60 per cent in cost of carbon paper and second sheets alone.

Ask for "Y and E" Copier Book No. 310 and sample of actual work.

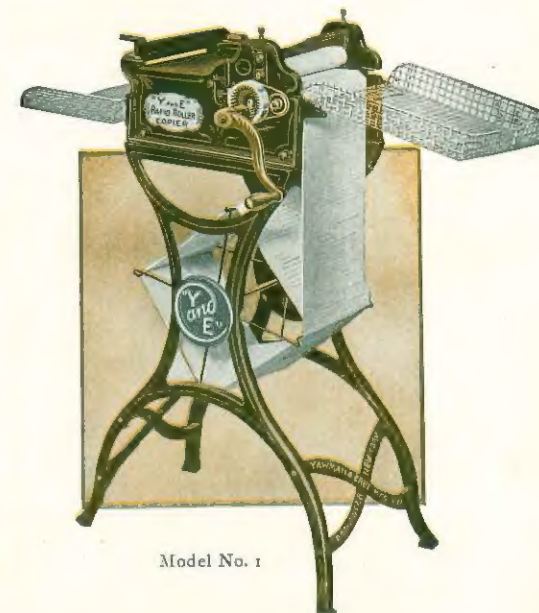

This cut shows the manner in which paper passes from roll into base; first, underneath the dampening-roller, through water in tank; second, up between crank-roller and wringing-roller, where it loses all superfluous moisture; third, between crank-roller and copying-roller, where it receives the matter to be copied; and fourth, over flange-roller down into the base.

Descriptions and Prices

WE make but one grade of Copier—known as Model E—and that the highest, but we furnish this machine with three different styles of base, and with electric motor for one of these.

Please bear in mind that a "Y and E" Copier is not a toy, but a machine constructed to give lifelong service. Skill and materials can produce no better. Each is the best value obtainable for the amount expended.

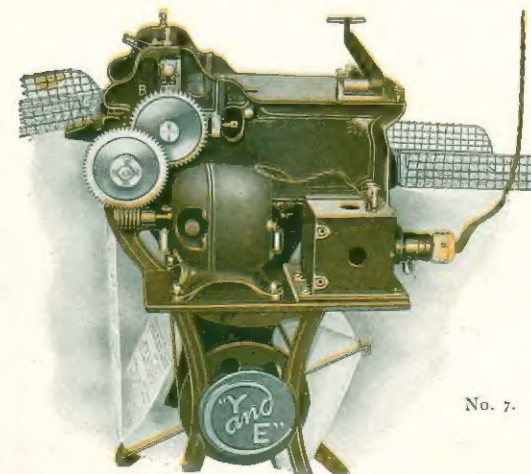

Model No. 1

Summary

Model No.	Base.	Price.	With Mahogany Base.	Shipping Weight.	Floor Space.
1	Metal	\$30.00		110 lbs.	25 1/4 in. long x 15 3/4 in. wide
2	Quartered Oak, short	\$35.00	\$41.00	155 lbs.	24 1/2 in. long x 16 in. wide
3	Oak Cupboard, long	\$40.00	\$47.00	180 lbs.	42 1/2 in. long x 16 in. wide
7	Metal	\$55.00		150 lbs.	25 1/4 in. long x 15 3/4 in. wide with electric motor.

Prices include Baskets and one Roll Standard White Linen Paper, which will make about 1000 copies.

No. 7.

Electric Motor Copier

WHERE the volume of correspondence is heavy—250 or more letters per day—the Electric Motor Copier is of valuable service. Where feasible, however, we find it better to install in each department a copier operated by hand, than to concentrate the entire volume of copying at one point. In this way each stenographer can copy during the day all the letters she (or he) writes.

33 $\frac{1}{8}$	Paneled Backs for No. 7 Base, each	5.00	7.50

"Y and E" System Service and the "Y and E" Idea About Salesmen

THE "Y and E" idea about System is that the indexing methods should definitely help to carry out the big general purpose of the work in hand. In a selling organization one should consider whether the indexing of letters and records can be made to simplify the getting of SALES STATISTICS of various kinds, instead of merely considering whether the records can be indexed by name or by locality and so on. In a factory the indexing should help to determine the *economy* of output, as well as its mere volume. No need to elaborate—You get the idea. "Y and E" System means two things: Classification through indexing, and tabulation of facts through the arrangement of a record form.

THE "Y and E" idea of a salesman is a representative trained to give definite and valuable information on these

subjects. The "Y and E" selling policy is to have our representatives give such information with such courtesy and consideration for the customer that the latter may feel PERFECTLY FREE to consult a "Y and E" man without feeling that he has unchained a human bulldog who will attach himself until he gets an order!

This "Y and E" selling organization is supplemented by a thorough-going System Department, and by trained mail order correspondents at the Home Office.

Any business or professional man—anywhere—may freely secure "Y and E" System suggestions direct through a representative or by mail. Fact-giving printed matter about indexing and filing methods and typical samples of record forms suited to different uses will be furnished on request and without charge.

YAWMAN AND ERBE MFG. CO.
